NFANT MORTALITY is something frightful. We can hardly realize that of

all the children born in civilized countries, twenty-two per cent., or nearly one quarter, die before they reach one year; thirty-seven per cent., or more than

jority of these precious lives. Neither do we hesitate to say that many of these

infantile deaths are occasioned by the use of narcotic preparations. Drops, tinctures

and soothing syrups sold for children's complaints contain more or less opium, or

morphine. They are, in considerable quantities, deadly poisons. In any quantity,

they stupefy, retard circulation and lead to congestions, sickness, death. Castoria
